

**HEALTH POLICY IMPACTS:
ON & BY
MINORITY PEOPLES**

**SCHOOL OF PUBLIC HEALTH
UNIVERSITY OF NORTH CAROLINA
CHAPEL HILL
MARCH 1 & 2, 1978**

The Minority Student Caucus and the Student Union Board of the School of Public Health of the University of North Carolina at Chapel Hill are presenting the second in a series of conferences focusing on the unique and special concerns of minority peoples.

Last year's theme was "Perspectives on the Health of Black Populations." This year's conference theme is "Health Policy Impacts: On and By Minority Peoples."

The conference this year will focus on two major health policy areas: the National Health Planning and Resources Development Act of 1974 PL 93-641, and a National Health Plan (whether it be National Health Insurance or National Health Service).

We hope that this conference will enable us all the opportunity to stimulate new ideas and energies.

WELCOME!

"Our duty is to hold ourselves responsible to the people. Every word, every act and every policy must conform to the people's interests, and if mistakes occur, they must be corrected—that is what being responsible to the people means."

-Mao Tse-tung

"Development of the health services in the next few years will be both exciting and determinative. It is of vital importance that we never lose sight of our major objectives. Overcoming the financial barrier is indeed crucial, but of equal importance is the development of a delivery system that serves people better, uses resources economically and is accountable to those who pay for it and those who use it. These are the tests we must apply to all current proposals."
